Professional Qualifications: IsDB-BISEW Diploma

Course Title: Web Application Development with PHP and Frameworks		
Module	**Description**	**Course Duration (Hours)**
Module - 01	Computer Fundamentals	120
Module - 02	HTML,CSS3,Bootstrap	100
Module - 03	javascript	80
Module - 04	Database Driven Web Application using PHP, MySQL	160
Module - 05	JQuery , Wordpress	120
Module - 06	AngularJS & React	160
Module - 07	CodeIgniter , Laravel	160
Module - 08	VueJs	120
	Full Course Duration	1020

Technologies and Competencies:

- JavaScript
- HTML
- CSS3
- Bootstrap
- XML
- PHP
- Mysql
- JQuery
- Angular13
- Wordpress
- Woo commerce
- CodeIgniter
- Laravel
- Reactjs
- VueJS

Academic Qualifications:

Exam Title	Institute	Result
Masters **Passing Year:** 2019 **Duration:** 2018-2019	UNIVERSITY OF CHITTAGONG **Group:** SCIENCE **Concentration or Major:** MATHEMATICS	3.39
BSc (Hons) **Passing Year:** 2018 **Duration:** 2015-2018	UNIVERSITY OF CHITTAGONG **Group:** SCIENCE **Concentration or Major:** MATHEMATICS	3.23
HSC **Passing Year:** 2013 **Duration:** 2011-2013	B A F SHAHEEN COLLAGE,CHITTAGONG **Group:** SCIENCE	4.60
SSC **Passing Year:** 2011 **Duration:** 2000-2011	ESTERN REFINARY MODEL HIGH SCHOOL **Group:** SCIENCE	5.00

Projects:

1. **Title:** Hotel Management Ststem

   - **Description:** The Hotel Management System is a feature-rich web application which I developed in PHP, offering a seamless experience for both front-end users and back-end administrators. In addition to robust reservation management, billing, and invoicing, the system includes a dynamic gallery feature. This gallery functionality allows administrators to showcase images of the hotel's amenities and rooms, enhancing the overall presentation on the front-end.
     Key Features: User-friendly Front-end, Reservation Process, Admin Dashboard, Customer and Reservation Management, Billing System, Invoice Generation and Management, Dynamic Gallery Management, Room Type Management,Reports
     Technologies Used:
     - PHP for server-side scripting.
     - HTML, CSS, and JavaScript for the front-end development.
     - MySQL for database management.
     - Responsive design for optimal user experience across devices.
     The Hotel Management System now provides a visual showcase of the hotel's offerings through the dynamic image gallery, creating a more engaging and informative experience for potential clients.
   - **for details go to:** http://sunrise.wdpf54.tech

2. **Title:** Inventory Management System

   - **Description:** The Inventory Management System is a comprehensive web application which I developed using Laravel and jQuery, designed to streamline inventory control and enhance operational efficiency. With multiple user roles, authentication, and a flexible structure, the system facilitates the management of categories, products, suppliers, and customers. It also features robust purchase and sales processes, detailed reporting, and invoicing capabilities.
     Key Features: Authentication and Authorization, Categories Management, Product Management, Supplier and Customer Management, Purchase and Sale Details, Reporting, Payments, Returns Products
     Technologies Used
     Back-end: Laravel (PHP) for server-side scripting, MySQL for database management.
     Front-end:HTML, CSS, and jQuery for user interface.Responsive design for optimal experiences across devices.
   - **for details go to:** https://wdpf54.tech/inventory/index.php/login

3. **Title:** Restaurent Web App

   - **Description:** Explore a delightful dining experience with our restaurant app which I developed using React for the frontend and CodeIgniter for the backend. Customers can effortlessly navigate through our diverse food menu, categorized for easy browsing. Browse, add items to your cart, and seamlessly complete your order with our user-friendly checkout process. Plus, our admin panel empowers the restaurant to effortlessly add new delectable items, ensuring a fresh and exciting menu for our valued customers. Enjoy the convenience of online ordering and stay tuned for our latest culinary creations!
   - **for details go to:** https://github.com/Thouhid101090/Hamburger.git

4. **Title:** woocommerce web app

   - **Description:** I developed this comprehensive e-commerce web app using Wordpress offers users the ability to effortlessly browse, order, add items to their cart, and complete transactions securely through a smooth checkout process. Beyond the basics, your project includes features such as detailed reporting, invoice generation, and comprehensive payment status tracking.

     The admin panel serves as your command center, providing you with the tools to efficiently manage every aspect of your online store. From tracking and fulfilling orders to monitoring payment statuses and generating invoices, you have full control over the entire e-commerce lifecycle. This ensures a seamless and organized operation, allowing you to focus on providing an excellent shopping experience for your customers.
   - **for details go to:** https://wdpf54.tech/jabotio/

5. **Title:** OTP-Match

   - **Description:** I created a dynamic OTP (One-Time Password) generator using raw JavaScript. This project generates a random OTP each time, enhancing security by ensuring unique codes for user verification.
   - **for details go to:** https://match-otp.netlify.app/

6. **Title:** Restaurent Website

   - **Description:** Its a Restaurest Website I developed in react with dynamic routing. Also added third party API (TheMealDb).i can search whatever I want to eat.
   - **for details go to:** https://github.com/Thouhid101090/restaurant.git

7. **Title:** Restaurent Web App (API)

   - **Description:** its the API made in codeingitor of Restaurent Web App which developed in react(3 no project)
   - **for details go to:** https://github.com/Thouhid101090/hamburgerAPI.git

8. **Title:** Restaurent Website

   - **Description:** A Restaurent Website I developed in Angular.Dynamic routing.I used mealDb api to search foods
   - **for details go to:** https://github.com/Thouhid101090/Foodwagon.git

9. **Title:** Bank Transaction

   - **Description:** Its a simple bank app where I can deposit and withdrow money .Using Javascript it will calculate the total deposite,withdrow and balance.
   - **for details go to:** https://github.com/Thouhid101090/Functional-Baper-Bank.git

10. **Title:** All Countries

    - **Description:** Using rest-country Api I showed the country name, area, flag and population in React
    - **for details go to:** https://thd-all-countries-info.netlify.app/

11. **Title:** Protpolio Website

    - **Description:** Its an wdbsite of my protfolio.All the information about me is included there.I have done this website in vueJS.
    - **for details go to:** https://protfolio-thouhid.vercel.app/

12. **Title:** Gym Management System(for client)

    - **Description:** I developing this app using Laravel.
      Seamlessly manage user authentication, authorization, and diverse membership types. Easily add and organize members, handle payments effortlessly, and generate insightful reports.
    - **for details go to:** https://github.com/Thouhid101090/gym-management-system.git
